

# Making NCC data informed

Fredrik Johansson  
Head of Common Development  
NCC Group

# The basic idea becoming data informed

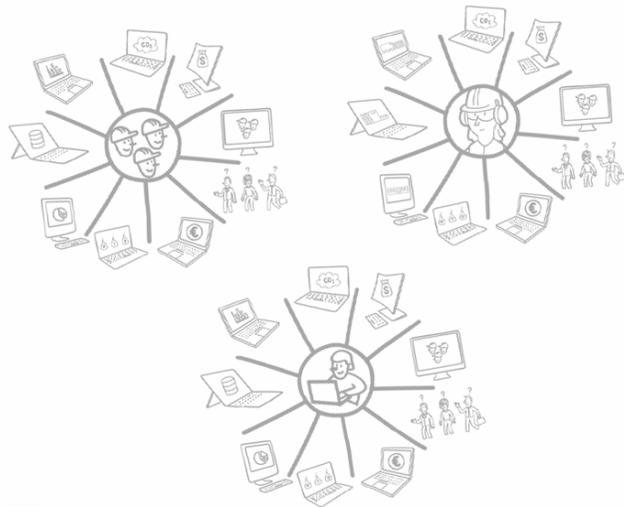

## Today

Individual search efforts through many channels and systems

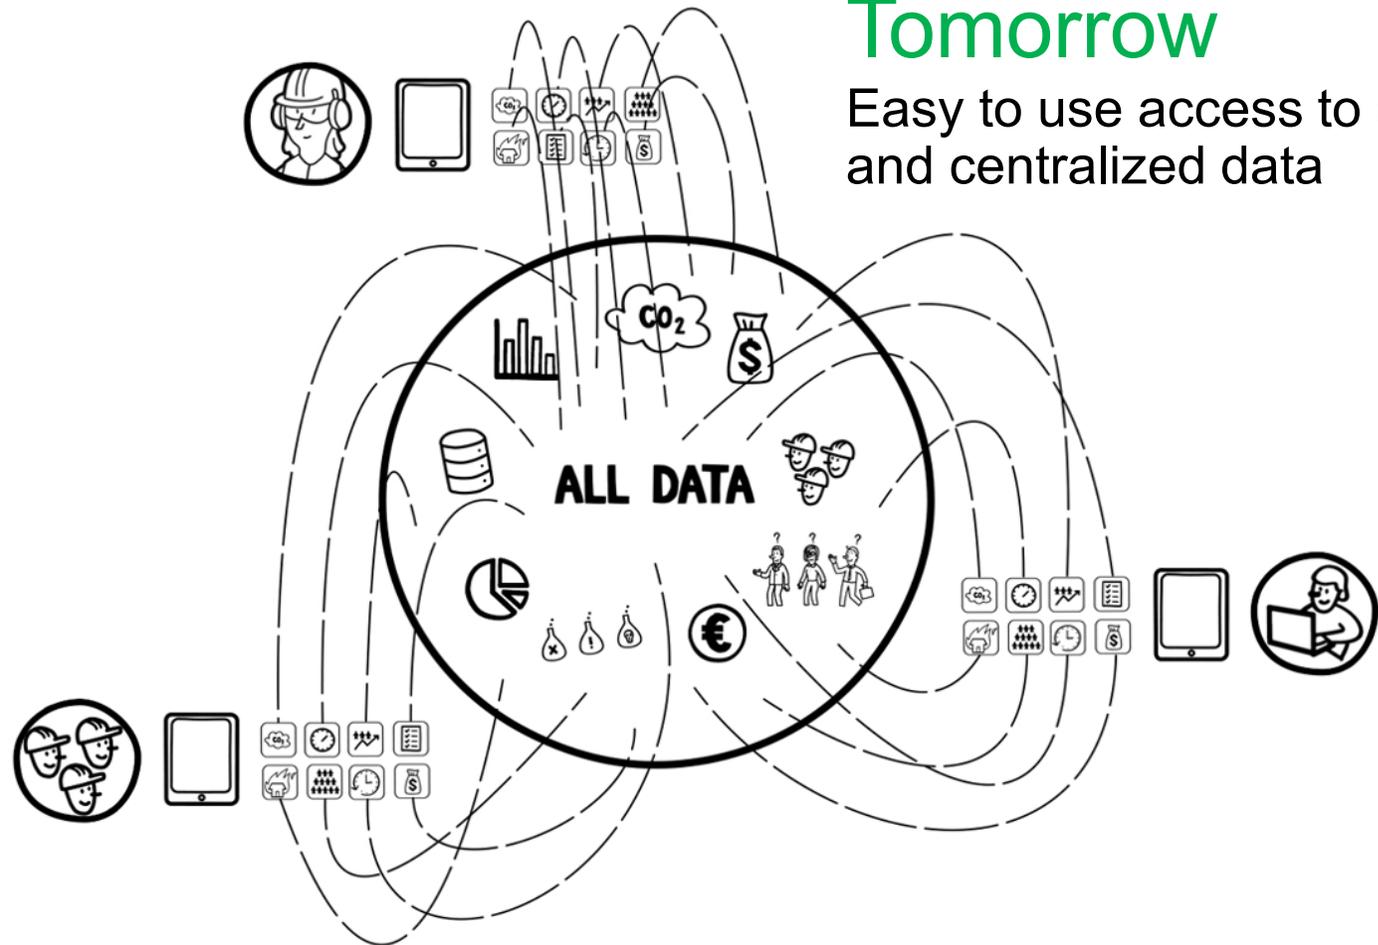

# The basic idea becoming data informed

## Today

Individual search efforts through many channels and systems

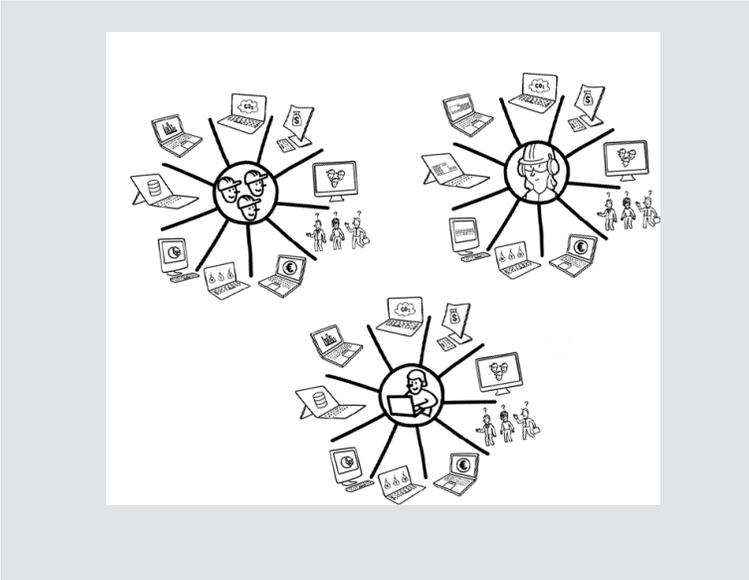

## Tomorrow

Easy to use access to common and centralized data

# The Common Development Plan

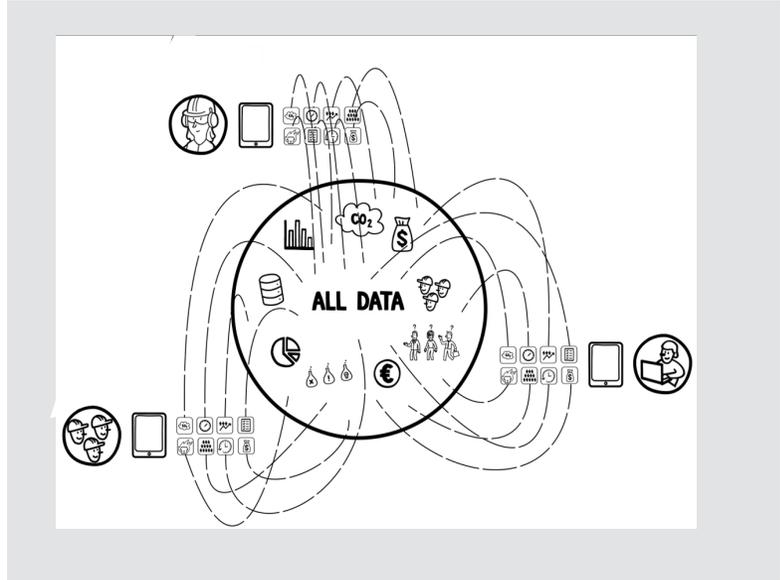

← “Close the gap” →

As-Is  
Business and IT

The Common  
Development Plan

Future state  
Business and IT

Important for operations today

Paves the way for becoming  
data informed

# Important aspects:

- Information security
- Data management
- All about details
- Standardized information language
